The fundamental theorem of algebra tells us that this n th-degree polynomial is going to have n exactly n roots, or another way to think about it, there are going to be exactly n values for x , which will make this polynomial, make this expression on the right, be equal to zero. So at first you might say, "Okay, that makes sense."

The Fundamental theorem of Algebra (video) | Khan Academy

Algebra requires proficiency with multiple representations, including symbols, equations, and graphs, as well as the ability to reason logically, both of which play crucial roles in advanced mathematics courses. Most states have standards for student knowledge in high school algebra. However, these standards do not typically provide evidence-based. 2
