Semi-Structured Interview. The most popular means of evaluating the psychological state of a chronic pain patient is a semi-structured interview (Bradley & McKendree-Smith, 2001), the results of which may frequently be given significant weight in treatment decisions. Self-report questionnaires and pain assessment programs can be used as adjuncts to the interview.

3 Reasons To Integrate Massage Therapy Into Your Chronic ...

An epidural steroid injection is performed to help reduce the inflammation and pain associated with nerve root compression. Nerve roots can be compressed by a herniated disc, spinal stenosis, and bone spurs. When the nerve is compressed it becomes inflamed. This can lead to pain, numbness, tingling or weakness along the course of the nerve.
