review of data validation methods as capably as evaluation them wherever you are now.

Literature Review Of Data Validation Methods

A number of themes emerged from the review relating to data availability, lack of standardized sources of data, the complexity of the ESS and the lack of validation of the surveillance systems. The increased number of data sources used in ESS reflects the fact that more electronic clinical data continues to become available 6. However, the fact that 17% of the studies in this review did not use the recommended data suggests that availability of relevant data is still one gap that must be ...
